

INVU:

Invu for Sage 200

Greater visibility into the Purchase Invoice Process.

The Invu for Sage 200 solution is designed to help finance departments automate clerical tasks associated with filing and the processing of invoices.

INVU:

Invu for Sage 200

"We can immediately identify an invoice whenever there is a credit control query. We can identify at what point the document has gone through the purchase order process."

Brian Wilcox,
Northern Feather

Automating the accounts payable process for Sage 200

Invu supports finance departments to deliver many cost and productivity benefits by eliminating clerical tasks associated with filing and processing invoices through automation. This provides CFO's with increased control and visibility of invoices being received by an organization and immediate access to the current financial commitment. In short, the manual methods of extracting and validating accounts payable data are slow, costly and error prone.

Invu integrates with Sage 200 systems and will compliment your existing working practices such as invoice approval and invoice coding.

Invu also ensures that your customer service levels are dramatically improved. Rapid access to invoices, files and documents direct from Sage 200 means that customers and suppliers notice instant improvements in the resolution of any queries. Together with quicker service this means improved supplier and customer satisfaction.

The software is simple to use so adoption is quick and there's minimal disruption to your business.

Invu works collaboratively with you to scope your requirements and define the solution by reviewing and assessing your internal processes. This approach ensures both the client and Invu are clear on the deliverables and ensures a successful project with a clearly defined return on investment.

Key Benefits

- ▶ Significantly reduced invoice processing costs
- ▶ Accelerated cycle times
- ▶ Stronger internal controls
- ▶ Centralise AP process
- ▶ Optimised cash management
- ▶ Greater visibility and control of finance management
- ▶ Improved supplier relationships with better visibility of invoices
